So there is this VSV on the passenger side of the engine bolted to the side of the head that takes a vacuum from the intake manifold and switches that vacuum to the fuel pressure regulator. And this interesting attached diagram shows that there is a variation of the system where it is NOT present, see the box in the diagram that says W/O COOLER.

vacuum pump, apply vacuum and maintain maximum vacuum of 68-85 kPa (20-25 in-Hg).  
CAUTION: Do not hold the steering wheel against the stops for more than 3 to 5 seconds at a time.  
Damage to the power steering pump can occur.
