This article will cover the replacement of the timing belt on a 2000 Volkswagen Jetta TDI equipped with the 1.9 ALH engine. The ALH engine was also used in other Volkswagen and Audi vehicles. Replacement should be similar, but some steps might vary. This belt replacement should not be attempted by novice mechanics. Specialized tools, computer software and laptop will be required to complete ...

Replacing the Timing Belt on a Volkswagen Jetta TDI MKIV

Many modern production automobile engines use a timing belt to synchronize crankshaft and camshaft rotation; some engines, particularly cam in block designs, used gears to drive the camshaft, but this was rare for OHC designs. The use of a timing belt or chain instead of gear drive enables engine designers to place the camshaft(s) further from the crankshaft, and in engines with multiple camshafts a timing belt or chain also enables the camshafts to be placed further from each other.

Timing belt (camshaft) - Wikipedia

Hyundai. You should replace the timing belt on your Hyundai about every 60,000 miles. If you have a long commute or travel often in extreme weather, you may also have to replace its water pump at the same time. While that can be a costly repair package, preventative maintenance will save you thousands

engine. Take off the upper timing belt cover. Slightly loosen the 3x 13mm injection pump sprocket bolts. Only loosen them enough so that the sprocket can slide under their pressure - if you loosen them fully, the injection pump may move independently of the sprocket due to pressure from the belt and internal forces.
