Evolution Study Guide - AP Biology with Mrs. Todd at Mount ...

Evolution is shaped by a number of mechanisms, including selective pressures, sources of variation, and random effects, such as genetic drift. Biological species concept: a species is a reproductively isolated population able to interbreed and produce fertile offspring. In allopatric speciation, geographically separated populations develop into different species.

AP Biology — bozemanscience

AP Biology: Evolution A major difference between an Advanced Placement Program (AP) biology course and a regular high school biology course is the emphasis on detail. One of the areas of concentration that could appear on an AP biology exam is evolution and related processes, such as mutation, natural selection, and genetic drift.

AP Tests: AP Biology: Evolution | Test Prep | CliffsNotes

The Theory of Evolution is considered a Unifying Theory of Biology, because it answers many of these questions and offers an explanation for the data. Lamarck's Theory of Acquired Characteristics Some thought that you would gain or lose features if you overused or didn't use them, and you could pass these new traits onto your offspring.
