Biodiversity and coronaviruses The emergence of COVID-19 has underscored the fact that when we destroy biodiversity, we destroy the system that supports human life. The more biodiverse an ecosystem is, the more difficult it is for one pathogen to spread rapidly or dominate; whereas, biodiversity loss provides opportunity for pathogens to pass ...

Global Biodiversity Protection. By Abbie Dosell, Marine Conservation Institute GLORES Science Intern. Some of the world's most biodiverse and ecologically valuable marine ecosystems are sporadically distributed among different regions and cultures globally. Due to this diversity, a one-size-fits-all marine protected area (MPA) framework is not sufficient to protect biodiversity.
