Amazon.com: Human Tumors: Histology, Diagnosis, and ...

The first edition of Human Tumors appeared in French in 1923; the second, a complete revision, in 1957. Now in English, it makes accessible to American pathologists both the systematic, deductive approach to oncologic taxonomy and the detailed microscopical observations supporting it which characterize that school.

Human Tumors: Histology, Diagnosis and Technique | JAMA ...

Tumor histology features four distinct architectural patterns and two neoplastic cell types (Fig. 31.13A and B). The majority of tumors demonstrate papillary, sclerotic, solid, and hemorrhagic growth patterns, whereas more than one-third feature three of the patterns. The remainder contains only two patterns, and only rare cases have a single architectural pattern (which some might not consider an SP but rather an adenoma).
