Year 7 Map skills revision - Toot Hill School

Scale and distance Most maps have a scale. These help us to work out distances on maps. This is given by the scale statement (eg 1:25,000) and/or by showing a scale bar. The scale shows how much bigger the real world is than the map. If the scale is 1:50,000 it means that the map is 50,000 times smaller than the real world.

Year 7 Maths

The U.S. Geological Survey publishes maps at various scales. The scale used for most U.S. topographic mapping is 1:24,000. Maps published at this scale cover 7.5 minutes of latitude and 7.5 minutes of longitude; they are commonly called "7.5-minute quadrangle" maps. Map coverage for the United States has been completed at this scale,

Map Scales - USGS

Map implies a diagrammatic portrayal of an entire area of earth or a part thereof, drawn on a flat surface on the basis of scales. However, it is not possible to flatten the circular shape exactly. The map is used to highlight specific and detailed characteristics of a particular area on a sheet of paper, which can be handled and transported ...

Revising All of the Map Skills | Year 7 Geography

Objective - To be able to locate places and features on a map using 6 figure grid references. Task 1 - Study the grid below and watch carefully how a whole grid can be split up into 10! Task 2 - Use ActivInspire to overlay an annotation board. Draw on a symbol and ask students to write out the six figure grid reference. Practise a few times and then try it without the 'pretend' grid lines.
