The paper should summarize key implications for palliative nursing. Papers may address physical or psychological symptoms and authors are encouraged to address a broad range of symptoms common in palliative care. Manuscripts should be 10-12 pages in length with approximately 15-20 references.

Journal of Hospice & Palliative Nursing

Hospice is medical care to help someone with a terminal illness live as well as possible for as long as possible, increasing quality of life. An interdisciplinary team of professionals who address physical, psychosocial, and spiritual distress focused on both the dying person and their entire family.

Posted on Thursday January 23, 2020 in Spiritual Care, Hospice Education Psychosocial factors are an important consideration in assessing a patient's needs. Even physical symptoms like pain can be affected by the psychosocial influences on the patient.

How Psychosocial Factors Affect Pain

The ASSESSMENT part of the hospice psychosocial assessment "Initial psychosocial assessment" means more in hospice talk then just assessing psychosocial functioning. In the hospice world it actually refers to the set of tasks that the social worker accomplishes when making her introduction to a patient and family.
